

BrainVita

What is the system being Developed ? Project Objective .

The objective of the project is to increase productivity of the brain for the user.

To elaborate more on this , there will be a psychometric test which will suggest the user to select a particular memory exercise .

There will be parts of the project which will concentrate on Memory Enhancement and training to increase the intellect.

Some useful tips will be provided to the user while engaging in the exercises.

What will be done ? By when ?

	Targets	Start Date	End Date
1.	Information Gathering	28-01-15	01-03-15
2.	Familiarization with Technology	30-01-15	10-02-15
3.	Designing	01-02-15	04-02-15
4.	Coding	05-02-15	10-03-15
5.	Testing	15-02-15	19-03-15
6.	Usage Documentation	20-02-15	--

Who is responsible for a function ?

Modules	Responsibilities
Schedule Monitoring	Laxmi and Akshay
Initial Documentation	Laxmi and Akshay
Information Gathering	Laxmi and Akshay
Overall Design	Laxmi and Akshay
Psychometric Tests and Puzzle	Laxmi and Akshay
Games related to Memory enhancement	Laxmi
Games related to Intellect	Akshay
Coding and Testing	Laxmi and Akshay
Final Documentation	Laxmi and Akshay

How will the job get done technically and manegerially?

The work is divided into modules. As all the individual components will be developed they will be integrated into a whole, to produce the final working application.

How much of each resource will be needed ?

1. IntelliJ or Eclipse (IDE) with Unix machine.
2. Android Software Development Kit (SDK) .
